NOTES TO THE FINANCIAL STATEMENTS**1. Summary of Significant Accounting Policies****A. Accounting Practices**

New England Life Insurance Company (the “Company”) presents the accompanying financial statements on the basis of accounting practices prescribed or permitted (“MA SAP”) by the Commonwealth of Massachusetts (“Massachusetts”) Division of Insurance (the “Division”).

The Division recognizes only the statutory accounting practices prescribed or permitted by Massachusetts in determining and reporting the financial condition and results of operations of an insurance company, in determining its solvency under the Massachusetts Insurance Law. In 2001, the National Association of Insurance Commissioners (“NAIC”) *Accounting Practices and Procedures Manual* (“NAIC SAP”) was adopted as a component of MA SAP.

Massachusetts has adopted certain prescribed accounting practices that differ from those found in NAIC SAP, none of which affect the financial statements of the Company. A reconciliation of the Company’s net income and capital and surplus between MA SAP and NAIC SAP is as follows:

	<u>SSAP Number ⁽¹⁾</u>	<u>Financial Statement Page</u>	<u>Financial Statement Line Number</u>	<u>For the Nine Months Ended September 30, 2017</u>	<u>For the Year Ended December 31, 2016</u>

(1) Statement of Statutory Accounting Principles (“SSAP”)

B. No significant change.**C. Accounting Policy**

(1-5) No significant change.

(6) Mortgage-backed bonds, included in bonds, are generally stated at amortized cost using the scientific method unless they have a NAIC rating designation of 6, which are stated at the lower of amortized cost or fair value. Amortization of the discount or premium from the purchase of these securities considers the estimated timing and amount of prepayments of the underlying mortgage loans. Actual prepayment experience is periodically reviewed and effective yields are recalculated when differences arise between the prepayments originally anticipated and the actual prepayments received and currently anticipated. For credit-sensitive mortgage-backed and asset-backed bonds and certain prepayment-sensitive bonds (e.g., interest-only securities), the effective yield is recalculated on a prospective basis. For all other mortgage-backed and asset-backed bonds, the effective yield is recalculated on a retrospective basis.

For certain residential mortgage-backed securities (“RMBS”) and commercial mortgage-backed securities (“CMBS”), both an initial and final NAIC designation is determined on a security-by-security basis based on a range of values published by the NAIC. The initial designation is used to determine the carrying value of the RMBS or CMBS. RMBS and CMBS with initial designations of 1 to 5 are stated at amortized cost, while RMBS and CMBS with initial designations of 6 are stated at the lower of amortized cost or fair value. The final designation calculation compares this carrying value with a range of values, resulting in a final NAIC designation reported herein, which is used for all other accounting and reporting purposes.

For loan-backed securities, including asset-backed securities (“ABS”), which are not modeled, the NAIC relies on the second lowest NAIC Credit Rating Provider (“CRP”) rating to determine the initial NAIC designation. The second lowest CRP rating is used to determine the carrying value of the security, which is based on the NAIC’s estimate of expected losses, using an NAIC published formula. The carrying value of the security determines its final NAIC designation, which is used for reporting in the Annual Statement and in risk-based capital (“RBC”) calculations. This revised methodology does not apply to NAIC 1 and NAIC 6 securities which are rated at the second lowest CRP designation.

D. Going Concern

Management does not have any substantial doubt about the Company’s ability to continue as a going concern.

B-C. No significant change.

D. Loan-backed Securities

- (1) Prepayment assumptions were obtained from published broker dealer values and internal estimates.
- (2) a. The Company did not recognize any other-than-temporary impairments (“OTTI”) on the basis of the intent to sell during the nine months ended September 30, 2017.
- b. The Company did not recognize any OTTI on the basis of the inability or lack of intent to retain the investment in the security for a period of time sufficient to recover the amortized cost basis during the nine months ended September 30, 2017.
- c. Impairments where the present value of cash flows expected to be collected is less than the amortized cost basis of the security are shown in Note 5D(3).
- (3) As of September 30, 2017, the Company has not recognized any OTTI on its loan-backed securities based on cash flow analysis.
- (4) At September 30, 2017, the estimated fair value and gross unrealized losses for loan-backed securities, aggregated by length of time the securities have been in a continuous loss position were as follows:
- | | | |
|---|----|------------|
| a. The aggregate amount of unrealized losses: | | |
| 1. Less than 12 Months | \$ | 1,613,180 |
| 2. 12 Months or Longer | \$ | 1,047,659 |
| b. The aggregate related fair value of securities with unrealized losses: | | |
| 1. Less than 12 Months | \$ | 45,796,909 |
| 2. 12 Months or Longer | \$ | 11,328,934 |
- (5) The Company performs a regular evaluation, on a security-by-security basis, of its securities holdings in accordance with its OTTI policy in order to evaluate whether such investments are other than temporarily impaired. Management considers a wide range of factors about the security issuer and uses its best judgment in evaluating the cause of the decline in the estimated fair value of the security and in assessing the prospects for near-term recovery. Factors considered include fundamentals of the industry and geographic area in which the security issuer operates, as well as overall macroeconomic conditions. Projected future cash flows are estimated using assumptions derived from management’s best estimates of likely scenario-based outcomes after giving consideration to a variety of variables that include, but are not limited to: (i) general payment terms of the security; (ii) the likelihood that the issuer can service the scheduled interest and principal payments; (iii) the quality and amount of any credit enhancements; (iv) the security’s position within the capital structure of the issuer; (v) possible corporate restructurings or asset sales by the issuer; and (vi) changes to the rating of the security or the issuer by rating agencies. Additional considerations are made when assessing the unique features that apply to certain loan-backed securities including, but are not limited to: (i) the quality of underlying collateral; (ii) expected prepayment speeds; (iii) current and forecasted loss severity; (iv) consideration of the payment terms of the underlying assets backing the security; and (v) the payment priority within the tranche structure of the security. For loan-backed securities in an unrealized loss position as summarized in the immediately preceding table, the Company does not have the intent to sell the securities, believes it has the intent and ability to retain the security for a period of time sufficient to recover the carrying value of the security and based on the cash flow modeling and other considerations as described above, believes these securities are not other than temporarily impaired.

E. Repurchase Agreements and/or Securities Lending Transactions

Uncollectible Premium Receivables

The Company had admitted assets of \$2,915,231 and \$3,247,073 at September 30, 2017 and December 31, 2016, respectively, in uncollected premiums and agents' balances in the course of collection. The Company routinely assesses the ability to collect these receivables. Based upon Company experience, the amount of premiums and other accounts receivable that may become uncollectible and result in a potential loss is not material to the Company's financial condition.

Litigation

Unclaimed Property Inquiries. On November 21, 2012, the West Virginia Treasurer filed an action against the Company in West Virginia state court (*West Virginia ex rel. John D. Perdue v. New England Life Insurance Company, Circuit Court of Putnam County, Civil Action No. 12-C-376*), alleging that the Company violated the West Virginia Uniform Unclaimed Property Act ("Act"), seeking to compel compliance with the Act, and seeking payment of unclaimed property, interest, and penalties. On January 31, 2017, the parties entered into a settlement agreement resolving these actions.

Sales Practice Claims and Regulatory Matters. The Company and certain of its affiliates have faced numerous claims, including class action lawsuits, alleging improper marketing or sales of individual life insurance policies, annuities, mutual funds or other products. Regulatory authorities in a small number of states and the Financial Industry Regulatory Authority, and occasionally the U.S. Securities and Exchange Commission ("SEC"), have also conducted investigations or inquiries relating to sales of individual life insurance policies or annuities or other products issued by the Company. These investigations often focus on the conduct of particular financial service representatives and the sale of unregistered or unsuitable products or the misuse of client assets. Over the past several years, these and a number of investigations by other regulatory authorities were resolved for monetary payments and certain other relief, including restitution payments. The Company may continue to resolve investigations in a similar manner.

Hartshorne v. NELICO, et al. (Los Angeles County Superior Court, filed March 25, 2015). Plaintiffs have named the Company in twelve related lawsuits in California state court alleging various causes of action including multiple negligence and statutory claims relating to the Diversified Lending Group Ponzi scheme. In August of 2016, a trial of claims by one of the 98 plaintiffs, Christine Ramirez, resulted in a verdict against MetLife, Inc., MetLife Securities, and the Company for approximately \$200 thousand in compensatory damages and \$15 million in punitive damages. On November 30, 2016, Ramirez consented to the court's reduction of punitive damages to approximately \$7 million. The judgment against the Company is approximately \$2.7 million. The defendants have filed a notice appealing this judgment to the Second Appellate District of the State of California. On May 2, 2017, the court awarded plaintiff approximately \$6.5 million in attorneys' fees and costs. The defendants have appealed this decision. A settlement in principle has been reached with 97 of the plaintiffs, including Ramirez.

Various litigation, claims and assessments against the Company, in addition to those discussed above and those otherwise provided for in the Company's financial statements, have arisen in the course of the Company's business, including, but not limited to, in connection with its activities as an insurer, employer, investor, investment advisor or taxpayer. Further, state insurance regulatory and other federal and state authorities regularly make inquiries and conduct investigations concerning the Company's compliance with applicable insurance and other laws and regulations.

It is not possible to predict the ultimate outcome of all pending investigations and legal proceedings. In some of the matters, large and/or indeterminate amounts, including punitive and treble damages, may be sought. Although, in light of these considerations, it is possible that an adverse outcome in certain cases could have a material effect upon the Company's financial position, based on information currently known by the Company's management, in its opinion, the outcomes of pending investigations and legal proceedings are not likely to have such an effect. However, given the large and/or indeterminate amounts that may be sought in certain of these matters and the inherent unpredictability of litigation, it is possible that an adverse outcome in certain matters could, from time to time, have a material effect on the Company's net income or cash flows in any particular period.

15. Leases

No significant change.

NOTES TO THE FINANCIAL STATEMENTS**16. Information about Financial Instruments with Off-Balance Sheet Risk and Financial Instruments with Concentrations of Credit Risk**

- (1) The table below summarizes the notional amount of the Company's financial instruments (derivatives that are designated as effective hedging instruments and derivatives used in replications) with off-balance sheet credit risk at:

	Assets		Liabilities	
	September 30, 2017	December 31, 2016	September 30, 2017	December 31, 2016

Options	—	—	—	—
Total	\$ 39,932,940	\$ 45,266,790	\$ —	\$ —

- (2) No significant change.
- (3) The Company may be exposed to credit-related losses in the event of nonperformance by counterparties to derivatives. Generally, the current credit exposure of the Company's derivatives is limited to the net positive estimated fair value of derivatives at the reporting date after taking into consideration the existence of master netting or similar agreements and any collateral received pursuant to such agreements.

The Company manages its credit risk related to derivatives by entering into transactions with creditworthy counterparties and establishing and monitoring exposure limits. The Company's OTC-bilateral derivative transactions are governed by International Swaps and Derivatives Association, Inc. ("ISDA") Master Agreements which provide for legally enforceable set-off and close-out netting of exposures to specific counterparties in the event of early termination of a transaction, which includes, but is not limited to, events of default and bankruptcy. In the event of an early termination, the Company is permitted to set-off receivables from the counterparty against payables to the same counterparty arising out of all included transactions. Substantially all of the Company's ISDA Master Agreements also include Credit Support Annex provisions which may require both the pledging and accepting of collateral in connection with its OTC-bilateral derivatives.

The Company's OTC-cleared derivatives are affected through central clearing counterparties. Such positions are marked to market and margined on a daily basis (both initial margin and variation margin), and the Company has minimal exposure to credit-related losses in the event of nonperformance by clearing brokers or central clearing counterparties to such derivatives.

Off-balance sheet credit exposure is the excess of positive estimated fair value over positive book/adjusted carrying value for the Company's highly effective hedges and derivatives used in replications at the reporting date. All collateral received from counterparties to mitigate credit-related losses is deemed worthless for the purpose of calculating the Company's off-balance sheet credit exposure. The off-balance sheet credit exposure of the Company's swaps was \$1,422,643 and \$1,835,577 at September 30, 2017 and December 31, 2016, respectively.

- (2) The Company had no wash sales with an NAIC designation 3 or below or unrated securities during the quarter ended September 30, 2017.

⁽²⁾ Separate Account assets are subject to General Account claims only to the extent that the value of such assets exceeds the Separate Account liabilities. Investments (stated generally at estimated fair value) and liabilities of the Separate Accounts are reported separately as assets and liabilities. Separate Account assets as presented in the table above may differ from the amounts presented in the Statutory Statements of Assets, Liabilities, Surplus and Other Funds because certain of these investments are not measured at estimated fair value.

Transfers between Levels 1 and 2 - During the quarter ended September 30, 2017, transfers between Levels 1 and 2 were not significant. Transfers between levels are assumed to occur at the beginning of the period.

Valuation Techniques and Inputs for Level 2 and Level 3 Assets and Liabilities by Major Classes of Assets and Liabilities:

When developing estimated fair values, the Company considers two broad valuation techniques: (i) the market approach and (ii) the income approach. The Company determines the most appropriate valuation technique to use, given what is being measured and the availability of sufficient inputs, giving priority to observable inputs.

The Company categorizes its financial assets and liabilities into a three-level hierarchy, based on the significant input with the lowest level in their valuation. The input levels are as follows. Level 1 - Unadjusted quoted prices in active markets for identical assets or liabilities. Level 2 - Quoted prices in markets that are not active or inputs that are observable either directly or indirectly. These inputs can include quoted prices for similar but not identical assets or liabilities other than quoted prices in Level 1, quoted prices in markets that are not active, or other significant inputs that are observable or can be derived principally from or corroborated by observable market data for substantially the full term of the assets or liabilities. Level 3 - Unobservable inputs that are supported by little or no market activity and are significant to the

determination of estimated fair value of the assets and liabilities. Unobservable inputs reflect the reporting entity's own assumptions about the assumptions that market participants would use in pricing the asset or liability.

The valuation of most instruments listed below are determined using independent pricing sources, matrix pricing, discounted cash flow methodologies or other similar techniques that use either observable market inputs or unobservable inputs.

⁽¹⁾ Classification of derivatives is based on each derivative's positive (asset) or negative (liability) book/adjusted carrying value, which equals the net admitted assets and liabilities.

Assets and Liabilities

The methods and significant assumptions used to estimate the fair value of all financial instruments are presented below.

The Company defines fair value as the price that would be received to sell an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. In most cases, the exit price and the transaction (or entry) price will be the same at initial recognition.

When developing estimated fair values, the Company considers two broad valuation techniques: (i) the market approach and (ii) the income approach. The Company determines the most appropriate valuation technique to use, given what is being measured and the availability of sufficient inputs, giving priority to observable inputs.

The Company categorizes its financial assets and liabilities into a three-level hierarchy, based on the significant input with the lowest level in their valuation. The input levels are as follows. Level 1 - Unadjusted quoted prices in active markets for identical assets or liabilities. The size of the bid/ask spread is used as an indicator of market activity for bonds. Level 2 - Quoted prices in markets that are not active or inputs that are observable either directly or indirectly. These inputs can include quoted prices for similar but not identical assets or liabilities other than quoted prices in Level 1, quoted prices in markets that are not active, or other significant inputs that are observable or can be derived principally from or corroborated by observable market data for substantially the full term of the assets or liabilities. Level 3 - Unobservable inputs that are supported by little or no market activity and are significant to the determination of estimated fair value of the assets and liabilities. Unobservable inputs reflect the reporting entity's own assumptions about the assumptions that market participants would use in pricing the asset or liability.

In general, investments classified within Level 3 use many of the same valuation techniques and inputs as described in the Level 2 discussions. However, if key inputs are unobservable, or if the investments are less liquid and there is very limited trading activity, the investments are generally classified as Level 3. The use of independent non-binding broker quotations to value investments generally indicates there is a lack of liquidity or the general lack of transparency in the process to develop the valuation estimates generally causing such investments to be classified in Level 3.

Excluded from the disclosure are investments accounted for under the equity method.

Bonds, Cash, Cash Equivalents and Short-term Investments

When available, the estimated fair value for bonds, including loan-backed securities, cash equivalents and short-term investments are based on quoted prices in active markets that are readily and regularly obtainable. Generally, these investments are classified in Level 1, are the most liquid of the Company's securities holdings and valuation of these securities does not involve management's judgment.

When quoted prices in active markets are not available, the determination of estimated fair value is based on market standard valuation methodologies, giving priority to observable inputs. The significant inputs to the market standard valuation methodologies for certain types of securities with reasonable levels of price transparency are inputs that are observable in the market or can be derived principally from or corroborated by observable market data. Generally, these investments are classified in Level 2.

When observable inputs are not available, the market standard valuation methodologies rely on inputs that are significant to the estimated fair value that are not observable in the market or cannot be derived principally from or corroborated by observable market data. These unobservable inputs can be based in large part on management's judgment or estimation, and cannot be supported by reference to market activity. Even though these inputs are unobservable, management believes they are consistent with what other market participants would use when pricing such securities and are considered appropriate given the circumstances. Generally, these investments are classified in Level 3.

The estimated fair value for cash approximates carrying value and is classified as Level 1 given the nature of cash.

NOTES TO THE FINANCIAL STATEMENTS

The use of different methodologies, assumptions and inputs may have a material effect on the estimated fair values of the Company's securities holdings.

Mortgage Loans

For mortgage loans, estimated fair value is primarily determined by estimating expected future cash flows and discounting them using current interest rates for similar mortgage loans with similar credit risk, or is determined from pricing for similar mortgage loans. The estimated fair values for impaired mortgage loans are principally obtained by estimating the fair value of the underlying collateral using market standard appraisal and valuation methods. Mortgage loans valued using significant unobservable inputs are classified in Level 3.

Contract Loans

The estimated fair value for contract loans with variable interest rates approximates carrying value due to the absence of borrower credit risk and the short time period between interest rate resets, using observable inputs and is classified as Level 2. For contract loans with fixed interest rates, estimated fair values are determined using a discounted cash flow model applied to groups of similar contract loans determined based on the nature of the underlying insurance liabilities, using unobservable inputs and is classified in Level 3.

Derivatives

The estimated fair value of OTC derivatives is determined through the use of pricing models for OTC-bilateral and OTC-cleared derivatives. The determination of estimated fair value, when quoted market values are not available, is based on market standard valuation methodologies and inputs that management believes are consistent with what other market participants would use when pricing such instruments. The significant inputs to the pricing models for most OTC-bilateral and OTC-cleared derivatives are inputs that are observable in the market or can be derived principally from, or corroborated by, observable market data. Significant inputs that are observable generally include interest rates, foreign currency exchange rates, interest rate curves, credit curves and volatility. Derivative valuations can be affected by changes in interest rates, foreign currency exchange rates, financial indices, credit spreads, default risk, nonperformance risk, volatility, liquidity and changes in estimates and assumptions used in pricing models. Generally, these derivatives are classified in Level 2.

Most inputs for OTC-bilateral and OTC-cleared derivatives are mid-market inputs but, in certain cases, liquidity adjustments are used when they are deemed more representative of exit value. Market liquidity, as well as the use of different methodologies, assumptions and inputs may have a material effect on the estimated fair values of the Company's derivatives and could materially affect the net change in capital and surplus.

Investment Income Due and Accrued

Due to the short-term nature of investment income due and accrued, the Company believes there is minimal risk of material changes in interest rates or the credit of the issuer such that estimated fair value approximates carrying value. These amounts are generally classified as Level 2.

Investment Contracts Included in Liability for Deposit-Type Contracts

The fair value of investment contracts included in the liability for deposit-type contracts is estimated by discounting best estimate future cash flows based on assumptions that market participants would use in pricing such liabilities, with consideration of the Company's non-performance risk (own-credit risk) not reflected in the fair value calculation. The assumptions used in estimating these fair values are based in part on unobservable inputs classified in Level 3.

Payable for Collateral Received

The estimated fair value of amounts payable for collateral received approximates carrying value as these obligations are short-term in nature. These amounts are generally classified in Level 2.

Separate Accounts

Separate Account assets and liabilities are generally carried at estimated fair value on the Statutory Statements of Assets, Liabilities, Surplus and Other Funds. These assets are comprised of certain mutual funds and hedge funds without readily determinable fair values given prices are not published publicly. Valuation of the mutual funds and hedge funds are based upon quoted prices or reported net asset values provided by the fund managers.

The difference between the estimated fair value of Separate Account assets in the table above and the total recognized in the Statutory Statements of Assets, Liabilities, Surplus and Other Funds represents amounts that are considered non-financial instruments.

Investment contracts included in Separate Account liabilities represent those balances due to policyholders under contracts that are classified as investment contracts. The carrying value of these Separate Account liabilities, which represents an equivalent summary total of the Separate Account assets supporting these liabilities, approximates the estimated fair value. These investment contracts are classified as Level 2 to correspond with the Separate Account assets backing the investment contracts.

The difference between the estimated fair value of investment contracts included in Separate Account liabilities in the table above and the total recognized in the Statutory Statements of Assets, Liabilities, Surplus and Other Funds represents amounts due under contracts that are accounted for as insurance contracts.

Explanation of basis of allocation by states, etc., of premiums and annuity considerations.

Premiums for Individual Life and Health Policies are distributed according to the address to which the premium notices are sent (if applicable). Considerations for Individual Fixed and Variable Benefit Annuities are distributed according to the state in which the annuitant or owner resides or the address designated as the one to which business communications should be sent (if applicable). For Group Life and Health policies covering less than 500 lives, the premiums received are generally allocated to the state in which the employees are principally located or in which the principal office of the group policyholder is located; for such policies covering 500 or more lives, the premiums or considerations are generally allocated to the state in which the owner of the certificate resides (if applicable).

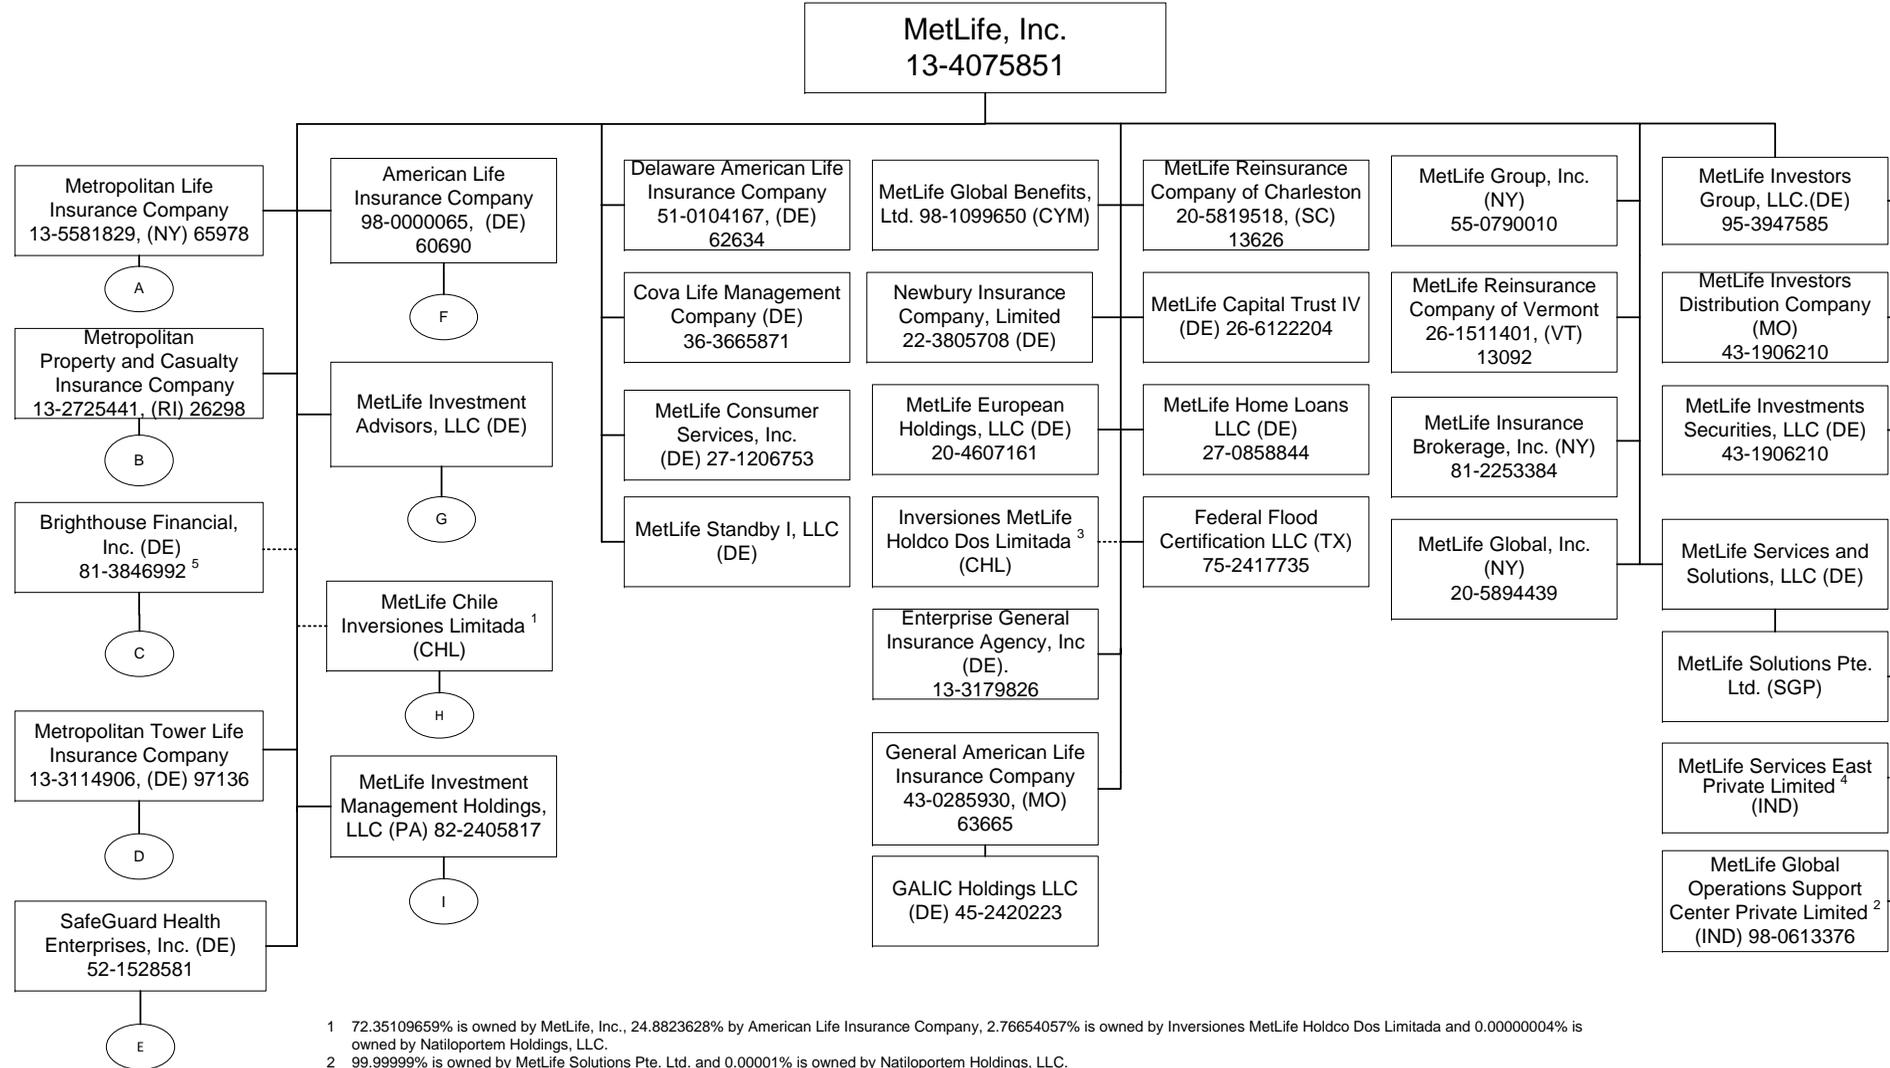

For Group Annuity contracts that are allocable, considerations are generally assigned to the state where the person making the contribution resides (if applicable). For Group Annuity contracts that are not allocable, considerations are assigned to the principal place of business of the contract sponsor (if applicable). Deposit-type funds for group contracts are allocated to the principal place of business of the plan sponsor, typically the employer that has established a pension or profit sharing plan for the benefit of its employees (if applicable). For individual agreements, deposit-type funds are allocated to the residence of the owner of the contract (if applicable).

As a result, MET's ownership of the BHF shares of common stock decreased to approximately 19.2%. MET granted BHF an irrevocable proxy to vote all of its remaining shares of BHF's common stock in proportion to the votes of BHF's other common shareholders.
